This illuminating review of the basic diagnostic and therapeutic skills used by dermatologists comprehensively demonstrates for primary care clinicians, their application in daily practice. Using extensive illustrations and an excellent library of color photographs, the authors provide an overview of basic skills and cover 33 common dermatological conditions encountered every day. "Dermatology Skills for Primary Care" offers clinicians an authoritative and easy to use resource that will not only improve basic dermatological skills, but also provide the broader foundation clinicians need when managing troubling skin disorders.
