isbn:9780849316920

Lipospheres in Drug Targets and Delivery: Approaches, Methods, and Applications presents an overview of the most recent applications of lipospheres primarily in the field of medicine, pharmaceuticals, and biotechnology. It includes chapters on preparation, characterization, delivery (of peptides, proteins, vaccines, nucleic acids), therapeutic applications to different systems, and suggestions for further research. Including numerous illustrations, tables, and photos, this book provides procedures for specific applications and biological systems and presents lipospheres as a technical solution to various problems associated with the controlled release of biochemicals.
