This volume in the brand-new SURGICAL TECHNIQUES IN OPHTHALMOLOGY SERIES discusses the history, development, and current techniques and technology relating to one of the most commonly performed operations in the world-cataract extraction and intra-ocular lens implantation. Descriptions, accompanied by numerous full-color illustrations, offer you step-by-step guidance on how to prepare for and carry out successful surgeries. A concise format complements the commentary and the surgical procedures on the accompanying DVD help you hone your clinical skills.

Master new procedures, improve outcomes, and learn the latest techniques faster via 179 full-color illustrations and a bonus DVD containing 72 minutes of surgical procedures. Avoid complications with pros and cons, pearls and pitfalls, and tricks-of-the-trade for all techniques. Enhance your clinical acumen through detailed coverage of the main surgical areas in ophthalmic practice today. Perform every surgery with accuracy using a consistent step-by-step approach to each procedure. Gain an absolute understanding about what equipment and instruments are required for each procedure.

Series Editors F. Hampton Roy , MD, FACS, Clinical Associate Professor, Department of Ophthalmology, University of Arkansas College of Medicine, Medical Advisor, Little Rock Surgery Center, Little Rock, AR, and Larry Benjamin , FRCS, FRCOphth, DO, Consultant Ophthalmic Surgeon, Department of Ophthalmology, Stoke Mandeville Hospital NHS Trust, Buckinghamshire, UK.
