出版者:Springer Verlag

出版时间:2008-6

装帧:HRD

isbn:9781588297167

This book provides a comprehensive examination of the newest biopharmaceutical drugs. Among the drugs discussed are ones in the categories of monoclonal antibodies for in-vivo use, cytokines, growth factors, enzymes, immunomodulators, thrombolytics, and immunotherapies including vaccines. Additionally, this volume examines new and emerging technologies, and contains a review of the Human Genome Project.
