著者: Mosby

出版者: Elsevier Science Health Science div

出版时间: 2003-12

装帧: Pap

isbn: 9780323019712

This innovative new resource covers basic body systems, beginning with the skin and ending with the reproductive system. The illustrations have been created specifically for this book, and each features a simplicity of scope and format that is perfect for

introductory anatomy and physiology courses. To ensure that students approach each figure correctly, all pages contain a brief statement describing the body system and directions for completion. From there, the student can color each body part and identify them by name using the labeled leader lines.
