出版时间:2004-3

装帧:Pap

isbn:9780721682525

This outstanding, comprehensive review resource provides the necessary tools to prepare for the Adult Nurse Practitioner certification exam, with over 1,000 multiple-choice review questions based on the actual exam content and format.

Clinical chapters are organized by body system, and are subdivided into three sections: Physical Exam and Diagnostic Tests; Disorders; and Pharmacology. Answers and rationales are provided at the end of each chapter. Other chapters include test questions that focus on growth and development, general health supervision and maintenance, and professional competencies inherent in the role of the ANP. A new CD-ROM contains all of the questions from the book to generate an unlimited number of 175-question sample exams designed to match the length and question distribution of the actual ANP certification exams.
