著者:Gould, Douglas J., Ph.D./ Dalley, Arthur F.

出版者:Lippincott Williams & Wilkins

出版时间:2004-11

装帧:HRD

isbn:9780781755726

Dynamic Human Anatomy is the perfect supplement to Lippincott Williams & Wilkins's

print anatomy products. This flexible electronic product can be used as a "programmable" presentation tool for instructors, a student/instructor information resource, an interactive atlas, and a study/review/testing aid. Version 2.0 includes 2,600 illustrations from Grant's Atlas of Anatomy, Eleventh Edition, Clinically Oriented Anatomy, Fourth Edition, Dean/Herbener's Cross-Sectional Human Anatomy, and Langman's Medical Embryology, Ninth Edition--plus 76 video clips from Acland's DVD Atlas of Human Anatomy and six embryology animations from Simbryo, Version 1.0. Also included are 300 USMLE-style review questions in gross anatomy, embryology, and neuroanatomy. Windows / Macintosh / Network Compatible
