This exciting resource takes readers inside the highly visual science of hematology,

combining abundant, high-quality color illustrations with expert descriptions of the most recent and clinically relevant advances in the field. Essential content focuses on the hematologic malignancies, emphasizing how an improved understanding of these disorders has served as a springboard to the development of effective anticancer treatments. Discussions by expert editors and contributors review Hodgkin's and non-Hodgkin's lymphomas, plasma cell disorders, myeloid disorders, coagulopathies, anemias, and the role of cytokines and stem cells. It includes hundreds of clear, vibrant illustrations that enhance diagnostic accuracy and guide treatment decisions.
