This revised text maintains the tradition of previous editions by incorporating an unrivalled number of color photographs to show key presenting signs and symptoms as they are seen in practice. From cover to cover you will find over 1,500 illustrations (most in color) comprising: clinical photographs, endoscopic images, ultrasound

scans, ECG's and summary tables. In addition to the illustrations, the book provides concise accompanying text, detailed legends and 'Key Facts' boxes to make exam revision that bit easier.
