著者:Rubin, Philip (EDT)/ Williams, Jacqueline P., Ph.D. (EDT)

出版者:Elsevier Science Health Science div

出版时间:2001-5

装帧:Pap

isbn:9780721674964

The 8th edition of this extremely popular textbook, widely known as the "Orange Syllabus," is completely updated and expanded to reflect the latest advances, approaches, and scientific developments in clinical oncology. New authors - representing a wealth of global, multidisciplinary expertise - explore cancer epidemiology and etiology, offer new insights into the biology and causes of various cancers and emphasise the improved prognoses for cancer patients. A free CD-ROM featuring the entire text and medline abstracts, has been included for this new edition!
