isbn:9780397553273

This exceptional review book provides extensive coverage of every aspect of nursing pharmacology. Students will appreciate the organized outline format when searching for information; and the questions and answers complete with rationale serve to enhance understanding and retention of learned material. Each chapter includes: Definition and Description, Physiologic Mechanism of Action, Indications, Contraindications, Side and Adverse Effects, Drug Interactions, Administration Information, Evaluation of Drug Therapy (including Nursing Assessment and Nursing Intervention), and Specific Information (including examples)
