This must-have manual for surgical residents and vascular surgery trainees is copiously illustrated with more than 250 original line drawings. The author presents in a

step-by-step fashion the techniques for all common vascular reconstructions, basics of exposure and access, as well as invaluable technical pearls and tips. The text provides the surgical trainee with the opportunity to review and practice the necessary vascular reconstructions before entering the operating room. The illustrations and clear instructions make this a manual that is referred to again and again throughout the surgical residency.
