This companion to "The Cleveland Clinic Intensive Review of Internal Medicine"

includes 62 cases across all subspecialties of internal medicine. Cases have been authored by house officers with reviews by distinguished Cleveland Clinic faculty. Plus, board review questions enable readers to identify and review weak areas as they prepare for the American Board of Internal Medicine exam. "The Cleveland Clinic Internal Medicine Case Reviews" provides step-by-step cases with a problem-oriented presentation style. Summaries of appropriate procedures and regimens are supported by the inclusion of recent literature. The case review book is enhanced with easy-to-use tables and summaries and large illustrations.
