出版时间:2003-11

装帧:HRD

isbn:9780723431961

McMinn's "Color Atlas of Head Neck Anatomy" is a large format atlas of the human head and neck, incorporating outstanding dissections, osteology, radiographic and surface anatomy images. The more complex dissections are accompanied by

orientational artworks and the book incorporates notes and commentaries on every dissection. Reference lists and dental anaesthesia information are incorporated into Appendices at the back of the book. The third edition has been updated to incorporate latest anatomic terminology and includes a number of new dissections, explanatory artworks and an expanded Appendix on Dental Anaesthesia.
