isbn:9780646445311

This is a new book on the integrated management of vulvovaginal disease. The authors come from a variety of backgrounds - gynaecology, dermatology, pathology and psychology - and describe a multidisciplinary approach to these conditions. The book has the most complete classification of vulvovaginal disease published, based on the etiology of 275 conditions; coverage includes benign, malignant, and functional (including psychosexual) diseases. Each disease has a descriptive summary, pathological features, and treatment guidelines. The book is illustrated in full color throughout.
