isbn:9780702027901

This is an indispensable reference for equine veterinary practitioners, veterinary students, and other involved in breeding and keeping horses. This new edition has been fully revised, updated and re-written in a more user-friendly style and format with the inclusion of high quality line drawings to aid understanding. Also, a conscious decision was made to remove all propriety names from the drugs making this as relevant as possible for everybody working in the equine field all over the world. * Listing of haematological, biochemical, physiological and therapeutic data in 1 volume, produced with the final year vet student and recent graduate in mind * Indispensible reference for equine veterinary practitioners, veterinary students, and other involved in breeding and keeping horses * Includes dosages and adverse reactions as recommended by the manufactureres in their data sheets and literature inserts (unless otherwise stated) * Trade names are included with generic names; all proprietary names from the drugs are removed to make this book relevant to everybody working in the equine field all over the world, whether vet student or equine specialist * Includes the main drugs available today
