Unlike any other source on the subject, this broad-ranging guide discusses the pathology, diagnosis, and treatment of 120 eyelid disorders including benign lesions, malignant tumors, and acquired and congenital malpositions and diseases. Written by leading researchers practiced in the analysis and management of these conditions, this source is a must-have reference for all ophthalmologists, optometrists, dermatologists, otolaryngologists, and general plastic and reconstructive surgeons caring for patients with eyelid and ocular adnexal disease.
