isbn:9780781746588

Written by the world's leading shoulder surgeons, this volume offers much-needed guidance on managing complex and revision problems that cannot be solved by standard treatment formulas. The authors present successful approaches with illustrative case examples, emphasizing avoidance of common pitfalls and management of complications. This edition has a greater focus on arthroscopic procedures and includes full-color arthroscopic images. New chapters cover arthroscopic rotator cuff reconstruction, idiopathic and diabetic stiff shoulder, alternatives to arthroplasty, and the failed arthroplasty. The thoroughly revised fractures section includes new information on two-, three-, and four-part fractures and AC/SC fractures. This edition contains over 800 illustrations.
