"The TNM Atlas" is designed as an aid for the practical application of the TNM classification system by illustrating the T and N categories in clear, easily understood graphics. The aim of such a presentation is twofold: to enable all disciplines involved to reach a more standardized understanding and documentation of the anatomic spread of tumours, and to further enhance the dissemination and use of the TNM classification. This Fifth Edition includes: all changes and additions to the Sixth Edition of "The TNM Classification of Malignant Tumours"; numerous new figures to illustrate changes and new definitions of categories of: head and neck tumours; some digestive system tumours; pleural melanoma; malignant melanoma of skin; breast tumours; urological tumours; and, ophthalmic tumours.
