"Catheter-Related Infections in the Critically Ill" provides an overview from an international perspective on intravascular catheters and the risk of infection. This volume highlights: Epidemiology; and Diagnosis Impact of Infection Management and Treatment Prevention - including Education as the Primary Tool for Prevention. The purpose of this book is to provide the practitioner with the most interesting and useful data in the field of catheter-related infection. It is hoped that the strategies to prevent infection detailed by the authors will be implemented and have a measurable impact in decreasing rates of infection in the intensive care unit setting.
