出版时间:2004-1

装帧:Pap

isbn:9780443071324

"Fundamentals of Pharmacognosy and Phytotherapy" is an important and timely book

that will add to this growing interest in the use and study of medicinal plants, herbs and other natural products. It will meet the need for a modern, up-to-date textbook for students in a wide range of disciplines, including pharmacy, herbalism, complementary and alternative medicine. The four authors - Professor Michael Heinrich, Dr Joanne Barnes, Dr Simon Gibbons and Dr Elizabeth Williamson - are all experts in their respective fields, whose collective knowledge gives both diversity and authority to this important new volume.
