Featuring full color cross-sectional images from The Visible Human Project, this new atlas is co-authored by a radiologist and includes orientation drawings with corresponding MRIs and CTs. Thus students can understand the relationship between anatomy and how it is represented in these imaging modalities. The text includes 100 full color tissue images, 200 line drawings, and 200 magnetic resonance and computed tomography images. Images are labeled with numbers; the key is on a separate two-page spread to facilitate self-testing.
