Visual diagnosis is of particular importance in the recognition of ophthalmological signs and symptoms. This atlas presents more than 750 brilliant photos taken at the University of Cologne's Eye Hospital. The selection of depicted diseases reflects the disorders which the ophthalmologist and the general practitioner must be prepared to see with in clinical practice, including tropical diseases of the eye. The exquisite quality of the photos and the anatomical drawings at the beginning of each chapter combine with comprehensive captions and a color thumb index to make this atlas an outstanding reference work for clinicians, practitioners and students alike.
