isbn:9780826114174

This is a compendium of over 30 tools for the measurement of professional and educational outcomes in nursing. It is a second edition of the award winning series of books on measuring outcomes in nursing. The tools and methods are presented with attention to purpose and utility, conceptual basis, development, testing, and reliability and validity assessments. Major topic areas focus on clinical decision making and performance in education and practice, student outcomes, and research. In most cases the complete measurement instrument is included in the book.
