出版者:Elsevier Science Health Science div

出版时间:2001-3

装帧:Pap

isbn:9780443079788

This is a question and answer review book that is cross-referenced to two of the leading textbooks in the specialty of anesthesia: Stoelting and Miller 'Basics of

Anesthesia' 3e and Miller's Anesthesia 5e. Designed for use by residents preparing for board certification and for practitioners preparing for their re-certification exam, the book is presented in a straightforward format. Correct answers to all questions are given and readers are able to refer back to the corresponding section in the Miller or Stoelting and Miller books for more detailed information.
