装帧:HRD

isbn:9783540412267

This multimedia textbook covers urethral surgery up to the most recent developments. The whole field is described by authors who are world authorities in their respective areas of expertise. The textbook is accompanied by a video CD-ROM on which all current surgical techniques are clearly demonstrated step by step. This publication is aimed primarily at surgeons active in the field of reconstructive urology. At the same time, all practicing urologists are offered a comprehensive account of therapies available for diseases of the urethra.
