出版者:Elsevier Science Health Science div

出版时间:2003-9

装帧:Pap

isbn:9780750674171

The revised and updated 2nd Edition of this popular handbook offers practical, clinical guidance on the diagnosis and therapeutic management of the 23 most common neuro-ophthalmic disorders. Pocket-sized for portability, it's organised to make essential information easy to find. Each chapter follows the same consistent format-overview and aetiology, physical examination, differential diagnosis, investigation and treatment. Photographs, figures, and tables summarise data for quick reference, and case reports throughout illustrate approaches to treatment. Six brand-new chapters on orbital disease reflect the growing prevalence of this disorder in practice.
