

Statistical Methods in Epidemiology

[Statistical Methods in Epidemiology_ 下载链接1](#)

著者:Kahn, Harold A./ Sempos, Christopher T.

出版者:Oxford Univ Pr

出版时间:1989-8

装帧:Pag

isbn:9780195050493

This book is based on Kahn's *An Introduction to Epidemiological Methods* (OUP, 1983). As the title change indicates, its discussion of the statistical concepts and methods that are fundamental to epidemiology has been substantially expanded. New material has been added throughout and there are two new chapters - 'Comparison of Numerical Results for Various methods of Adjustment' and 'The Primacy of Data Collection' - as well as an appendix of data from the Framingham Heart Study.
