isbn:9780853697268

This is a practice-oriented text covering all aspects of homeopathy. "Homeopathic Practice" uniquely approaches the subject of homeopathy by demonstrating how the theoretical principles underpinning practice directly translate to day-to-day

practice. Contributions from international experts highlight how homeopathy is practised in a variety of different environments around the world. Case studies and personal accounts demonstrate the wide breadth of involvement in homeopathic practice. The contents covers: homeopathic theory and the need for an evidence base; homeopathic drug provings and the Materia Medica; the production and use of homeopathic medicines; and the use of homeopathy by different healthcare providers working in a variety of global settings. "Homeopathic Practice" is a source of inspiration and reflection, as well as of reference. It will be of interest to healthcare providers who wish to widen their scope of practice and to people with a keen interest in homeopathy.
