isbn:9781588903952

This book presents the latest management techniques for pediatric neurosurgical disorders frequently encountered in clinical practice. In this edition, chapters are organized into separate sections including cerebral disorders, spinal disorders,

neoplasms, trauma, cerebrovascular disease, functional disorders, and infectious disorders. Each chapter describes the diagnostic studies, pathology and pathobiology, indications for surgery, treatment alternatives, prognostic factors and outcomes. New chapters cover ethical issues in pediatric neurosurgery, pediatric neurosurgery in developing countries, and in utero neurosurgery.
