"The Advances in Cancer Research" series provides invaluable information on the exciting and fast-moving field of cancer research. A very special event the Nobel Minisymposium, "Molecular Oncology - From Bench to Bedside," held at the Karolinska Institutet, in Stockholm, Sweden, was marked the celebration of George and Eva Klein's combined 160th birthday. To honor this occasion, this 2nd of two volumes brings together contributions by their former students, colleagues and collaborators of the past fifty years into a volume of "Advances in Cancer Research" dedicated to George and Eva. Over a decade ago, a subdivision of "ACR" called "Foundations in Cancer Research" was initiated and the tributes honoring the Kleins' bodies of work presented at the minisymposium are especially appropriate for the series.
