出版时间:2007-8

装帧:HRD

isbn:9780387708294

A superb source of reference reviews as well as a concise overview of the functional cross-talk between neurons and glial cells, this book also focuses on microglia and inflammation in the aging brain and in neurological disorders. The scientific spectrum covered by this book is of key interest, and is recognized by the scientific community as a major competitive area with critical implications for human health.
