This seminal work should guide the reader in daily practice. Overactive bladder (OAB) affects more than 17 million US men and women daily. Given the symptoms of sleep loss, depression, and a lower quality of life than even those with diabetes mellitus,

effective and beneficial treatment is a must for these people. Drs. Kreder and Dmochowski, both recognized experts on voiding dysfunction and urodynamics, have assembled a distinguished team of experts from around the globe to share with the reader, whether qualified or in-training, their perspectives based both on best practice and personal experience in evaluating and managing the overactive bladder. This seminal work should guide the reader in daily practice.
