出版者:Springer Verlag

出版时间:2006-11

装帧:HRD

isbn:9780387342290

This book presents a series of essays on neuroscientific aspects of human nature and instinctive behavior, individually acquired (learned) behavior, human bipedal locomotion, voluntary movement, and the general problem of how the brain controls behavior. The author argues that concepts of the mind based on ancient Greek philosophy are past usefulness, and that modern animal behavior studies provide a better guide to the functional organization of the brain.
