isbn:9780470019955

Cardiac intervention is a fast expanding field of medicine that is reducing the need for cardiac surgery. A Nurse's Guide to Caring for Cardiac Intervention Patients will enable nurses to fully prepare their patients and families for various cardiac intervention procedures. Coverage includes: * Explanations of what the heart condition is and how the procedure may relieve that condition * Descriptions of what the patient can expect to happen before, during and after the procedure * What nurses should observe for post procedure, and how to address any complications that may occur * Guidelines for discharge advice * Outlines for a pre and post care plan for each procedure - based on the latest research and experience. Nurses will find the book informative on common interventional procedures, but it is also designed as a tool to be dipped into when caring for patients with more unusual procedures. This practical book includes chapters on: cardiac catheterisation; percutaneous coronary intervention; percutaneous balloon mitral valvuloplasty; removal of femoral sheaths; cardioversion; temporary and permanent pacemakers.
