This fascinating book is loaded with practical information designed to help you in the commodity market. The author's method...proven by his million dollar success...does not involve complicated math or subjective evaluation. There are two completely systematic methods; %R and Momentum. The essence of these methods is that they tell you if the super powers are long or short; when the super powers expect a major move to start; what commodities are in true bull or bear markets; when to start buying and when to sell for gargantuan profits. This book is a must if you're a stock or

commodity trader. It will expose to you an exciting new approach to trading and thinking--the same approach that has made Larry Williams a millionaire.
