著者:Conrad, Ross

出版者:Chelsea Green Pub Co

出版时间:2007-6

装帧:Pap

isbn:9781933392080

Ross Conrad brings together the best organic and natural approaches to keeping honeybees healthy and productive. Readers will learn about non-toxic methods of controlling mites, breeding strategies, and many other tips and techniques for maintaining healthy hives. Specific concepts and detailed management techniques

are covered in a matter-of-fact, easy-to-implement way. The various chemicals used in beekeeping have, for the past decades, held Varroa Destructor, a mite, and other major pests at bay. However, chemical resistance is building and evolution threatens to overtake the best that laboratory chemists have to offer. In fact, there is evidence that chemical treatments are making the problem worse. Natural Beekeeping flips the script on traditional approaches by proposing a program of selective breeding and natural hive management. Natural Beekeeping describes opportunities for the seasoned professional to modify existing operations, increase profits, and eliminate the use of chemical treatments. Beginners will need no other book to guide them. Whether you are an experienced apiculturist looking for ideas to develop an integrated pest management approach or someone who wants to sell honey at a premium price, this is the book you've been waiting for.
