How do Uncle John and his crack team of researchers keep track of all the information they collect? The trick, says Uncle John, is to write down thoughts and ideas as soon as they come to mind. This fun gift book allows fans to emulate the practice. The pages offer plenty of room for scribbling down intriguing topics, weird words, jokes and puns, funny signs, and random bits of wisdom. Unlike the average blank book, however, these pages are peppered with facts, factoids, proverbs, and more — a little something from Uncle John to get the creative process moving.
