This is a revised edition of this bestselling guide to census records at The National Archives. Census records are some of the most valuable and frequently used by family

historians and the release of a new census every ten years is an eagerly anticipated event. Published to coincide with the opening of 1901 Census in January 2002, this new edition incorporates all the essential details for researchers wishing to exploit this new and important resource. It also offers practical advice to historians to find their way into the nineteenth century returns. It provides help in tracking down individuals as part of a family tree, and is equally helpful to social or economic historians, for example, comparing occupations in a particular suburb over a thirty year period. This important guide includes explains how to use the Family Records Centre in London, the home of the Victorian census records, and how to use The National Archive's finding aids as part of your research.
