From Elvis to the Beatles, from Michael Jackson to Marilyn Manson, rock stars claim to have seen, communed with, been inspired by, and sometimes even descended from extraterrestrials. Alien Rock is an irreverent, illuminating, all-access pass to the stars' unearthly encounters--some friendly, some frightening, and some frankly bizarre, including:

- The birth of Elvis was marked by the appearance of a mysterious blue light over his house.
- In August 1974, John Lennon spied a UFO from the window of the penthouse he shared with then-girlfriend, May Pang.
- Mick Jagger and Marianne Faithfull encountered a luminous cigar-shaped mothership while camping in the English countryside in 1968.
- Jimi Hendrix told a friend, "I am a spiritual messenger, sent here from another place."

Whether you're a UFO skeptic or a true believer, Alien Rock provides a fascinating new perspective on the long, strange trip that is rock 'n' roll history, and suggests that, wherever the road takes us, we may not be traveling alone.
