Unlike anything else available, these two coloring books *Seashores* and *Shells* contain black-and-white line drawings that encourage nature lovers to learn about these animals as they color their very own field guides. From the Northern Lobster to the

Harbor Seal, from the Knobbed Whelk to the Tulip Mussel, the new color stickers can be placed alongside the line drawings for visual reference. Coloring the drawings helps reinforce the color, image, and shape of each animal, plant, or shell, improving memory and perception while offering an enjoyable, easy way to learn. These books are suitable for any age or level of experience.
