More people are spending more time at home making more noise - yet they want quiet environments. This is the only book available that tells designers, planners, architects, and builders how to give homeowners and apartment-dwellers the quiet they crave.

Simple enough to be used by the average do-it-yourself (it avoids complex mathematics), yet so complete it will satisfy the requirements of knowledgeable building professionals, this authoritative guide gives you one-stop answers on designing, specifying, testing, and retrofitting residences to meet the new environmental standards and satisfy our need for peace and quiet.
