An amazing collection of oceanic photography, "Dolphins" captures all the gracefulness, quirkiness, and intelligence of these playful underwater mammals. Acclaimed nature photographer Tsuneo Nakamura, whose photographs have been hailed as "beautiful" (Science News) and "spectacular" (San Diego Magazine), "has traveled the world's richest waters from Hawaii to Honduras for some of the most

dynamic shots of dolphins ever captured. Here he brings together over one hundred remarkable photographs that reveal both the whimsical nature and the endearing affection toward humans that make dolphins one of the most intriguing and well-loved creatures of the sea.
