装帧:Pap

isbn:9781885061638

A field guide to 200 of Minnesota's beautiful wildflowers Full-page professional quality

photos and descriptions provide an easy-to-read format presenting information critical to accurate identification. Organized by color, this is a great guide for beginners. The material is easily understood by those with no botanical background but includes important, accurate information useful to those more familiar with botanical terms. Stan's notes provide the insight that a naturalist can give to help understand the plant world. It also includes symbols identifying plants as being typical of the BWCA and native prairies.
