isbn:9781885223708

Songs of Malantor is a step-up in complexity of cosmic information being given to humanity by the Arcturians to assist us in the times of change and to prepare us for citizenship in the greater galactic community. This volume includes chapters on our evolution, ascension, teleportation, astral travel, war, the spiritual nature of suns, the Challenger, suicide, the Mars probe, new millennium communities, birthdays, expanded views on Darwin, starships and the stargrids, the Nazca lines and time travel, starseeding of Earth, galactic use of stone monuments (such as the pyramids and Stonehenge), remaking of Camelot and the Kennedy administration, Atlantis, and Lemuria, and the importance of movies on our consciousness.
