Myanmar (Burma) supports one of the richest and most diverse bird communities in mainland Southeast Asia. This descriptive field guide to the birds of Myanmar will appeal to both novices and seasoned birdwatchers. The listings include colour illustrations of each bird, along with standard information for accurate identification, including family characteristics, approximate size, habitat, behaviour, voice, breeding season, protected status, and any other distinctive features. Birds are identified by both common English names and scientific names. A handy checklist precedes the index.
