A wild feast for any fan of rock and roll and contemporary art, Stones by Kruger captures the essence of the British rockers on canvas. Considered the finest caricature

painter in the world, Sebastian Kruger created a remarkable collection of surreal, humorous portraits of Keith Richards, Mick Jagger, Bill Wyman, Ron Wood, and Charlie Watts — inspired by a lengthy tour with the band. These masterfully rendered paintings depict the musicians in a variety of poses and situations, running the gamut from pensive and introspective to wild and raunchy. Includes 80 color illustrations.
