For Jung, the beautiful and brilliantly creative 28-year old Christiana Morgan was an inspired force whose path in self-analysis paralleled his own quest for personal knowledge. By teaching Morgan the trance-like technique of active imagination, Jung helped her embark on a series of archetypal adventures which she depicted in paintings of great virtuosity and he candidly recounted at a seminar given to some of his closest followers. Through his eloquent description of the fiery, mythic visions of a woman discovering her repressed sexuality and feminine power, Jung reveals how deeply this encounter challenged his understanding of feminine psychology. These two volumes bring together for the first time colour reproductions of Morgan's paintings with a complete transcript of the seminar.
