Twenty-two fun and witty proverbs are assembled together with their corresponding English translations and western equivalents. From generation to generation in Vietnam, these intriguing oral traditions are learned at mothers' knees; told in the mountains; whispered in the fields; murmured on the river banks; and floated amidst the reeds. It was the author's early childhood exposure to rhymes and poetry that has given him a lifelong fascination with proverbs that reflect on both the happy and the sad moments of one's life.
