The Book "An Overview of Extraterrestrial Races" is a unique compilation of information, a dictionary if you will, of Who is Who. It is approximately the size of an average yellow pages, 400 pages, yet the data in the book is far from average.

Containing controversial material of terrestrial and extraterrestrial nature, it lists names of the gods, angels, teachers, and/or alien visitors to our planet from the beginning of times.

The author, Rolf Waeber mentions the top-secret societies and organizations on Earth and beyond. The book is full of predictions, descriptions of star systems, galaxies, universes, UFO sightings/crashes, cosmic events from ancient times to present day and

so much more, all in alphabetical index, all in one book.

After thirty years of research and the gathering of information this book was launched. The author provides the information, not the explanation. He lets the reader decide "what is what". Many references and sources are provided when available, however some findings originated from the spiritual/metaphysical perspective of the seers and the light workers, which are difficult to prove.

Some readers may find this book startling, beyond comprehension, or radical, well...the idea of a man on the Moon, not that long ago, was considered radical too.

To break the "monotony" of the vast amount of data, it coincides with cosmic art, B/W in the book. To see full color versions visit

Please note that all creative writing: poems, foreword by Yeva and the introduction by the author, Rolf Waeber are written in their own original English (not translated), which is the second language of those involved. "An Overview of Extraterrestrial Races" "Who is Who in the Greatest Game of History", is an important guide to all who are searching for the truth.
